

HealthLine Systems' Clients Are Well Represented Among the Nation's Most Prosperous Healthcare Organizations

Fourteen of fifty of the nation's highest revenue-generating for-profit healthcare organizations use one or more software solutions from HealthLine Systems

([PRWEB](#)) August 17, 2011 -- Becker's Hospital Review has identified the 50 top grossing for-profit hospitals in the United States, according to CMS cost report data analyzed by American Hospital Directory. Twenty-eight percent or 14 of these 50 financially successful healthcare organizations use one or more software solutions from HealthLine Systems.

HealthLine Systems' CEO Dan Littrell commented: "We're proud of our clients included among the nation's most financially prosperous healthcare organizations. HealthLine Systems' industry-leading software solutions help our clients improve access to care, strengthen relationships with consumers and physicians, move toward paperless provider credentialing, track and trend patient safety incidents, and document improvements in quality."

HealthLine's specialized software packages and consulting services assist clients to meet their unique challenges with physician credentialing, quality assurance, contact centers, and managed care. HealthLine Systems is recognized as a leading supplier of provider data management software designed to promote healthcare standards, reduce costs, and enhance patient satisfaction.

About HealthLine Systems

HealthLine Systems offers EchoCredentialing, web-based credentialing and provider management software; EchoQuality, an integrated and comprehensive quality management software solution that supports patient safety and regulatory compliance initiatives and EchoAccess, healthcare's first fully web-enabled contact center solution with a web-browser user interface. All product lines are offered as either hosted/cloud or as installed solutions.

HealthLine Systems' client base represents over a thousand distinguished healthcare organizations in 50 states, Canada and Mexico. Incorporated in 1985, HealthLine is committed to provide peerless information management solutions to maximize the quality and delivery of healthcare services through technological innovation.
